Notices:

- A. Battery warranty expiration date shall be defined as the first arrived condition when the battery pack reaches the warranty period, the life cycle discharge is completed, or the remaining capacity EOL meets the specification requirements. The battery energy distribution unit (BDU) only involves the warranty period and has nothing to do with the battery performance. The battery pack and battery energy distribution unit shall be provided with an independent warranty.
- B. Capacity test conditions: at an ambient temperature of $25^{\circ}\text{C}\pm 3^{\circ}\text{C}$, after charging to 100% SOC, let it stand for 10 minutes, and discharge the tested battery cell at a set current of 0.2C to the discharge termination voltage, and record the amount of electricity released in the process.
- C. In order to remotely upgrade the latest firmware to ensure battery life, the battery is highly recommended to connect to the HYXiPOWER Smart Energy Platform.
- D. After the battery is purchased, the installation needs to be completed within 3 months. If the battery fails, it needs to be reported within 14 days. The battery cell damage caused by the negligence of battery that cannot be charged for a long time is not covered by the warranty.
- E. The operation and service life of battery is related to the working temperature. Please install the battery at a temperature equal to or better than the ambient temperature. The recommended working temperature for the battery is $-10\sim 50^{\circ}\text{C}$.
