# Why HYXI Cloud?

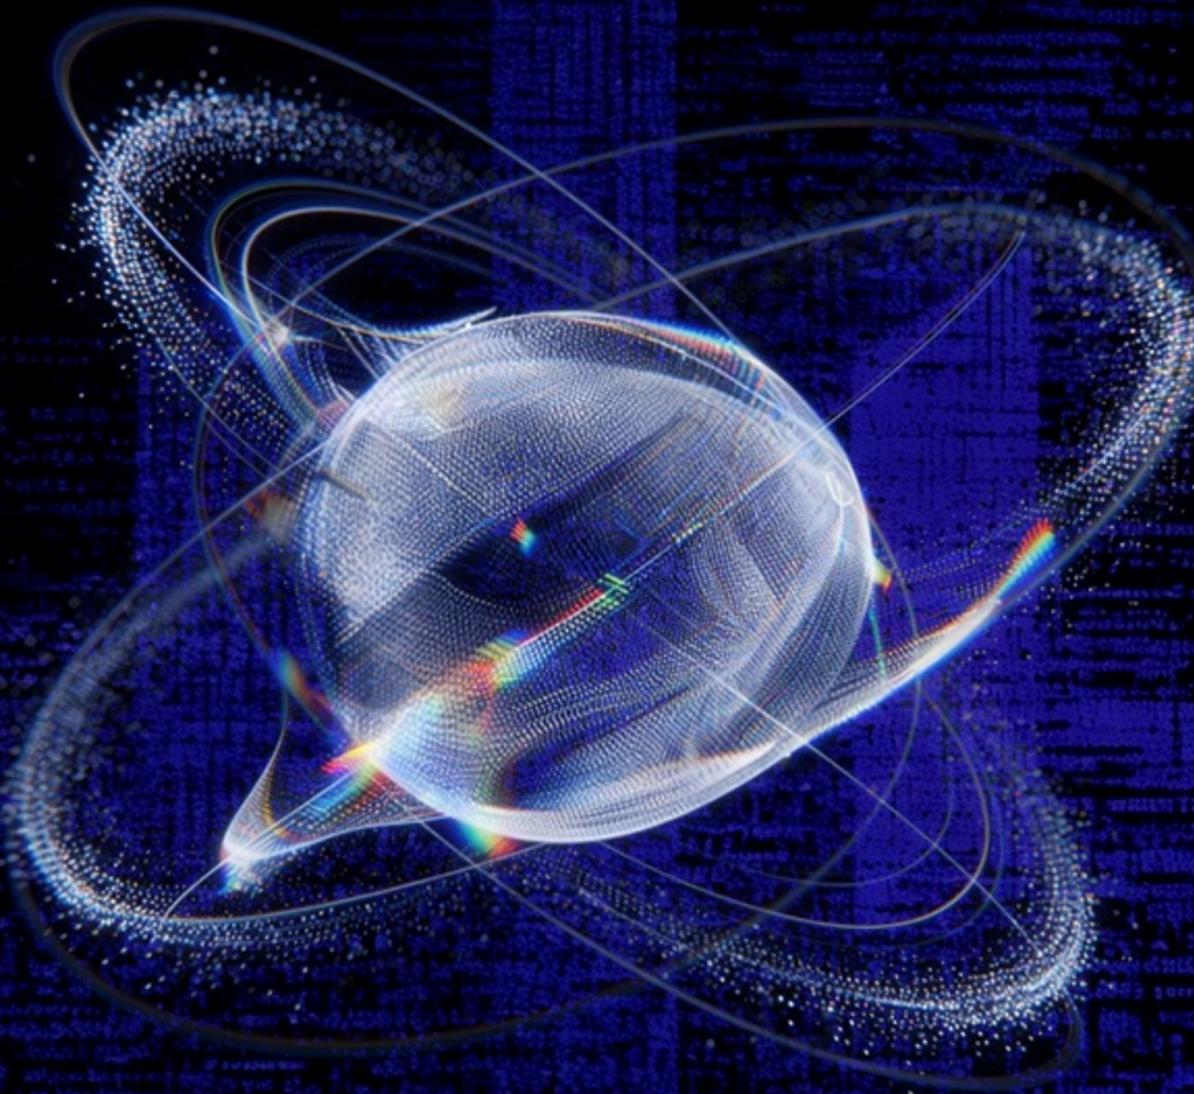

Designed for everyday energy operations across residential, commercial, and distributed assets.

HYXI Cloud helps you bring systems online faster and stay in control as they scale. It makes devices easier to connect, operations easier to see, and performance easier to optimize with AI support.

So daily work becomes simpler—and long-term decisions are smarter.

# AI-Driven Intelligence, Smarter Decisions

AI Smart Dispatch | Real-Time AI Assistant

## AI Smart Dispatch

The AI continuously analyzes electricity price changes and energy usage to manage when to charge and discharge for you, so there's no need to monitor data or adjust parameters yourself. By reducing decision bias, it helps improve the stability and predictability of returns.

# Real-Time AI Assistant

Powered by Industry-leading multimodal AI, you get instant help whenever you need it. It can read manuals for you, provide clear step-by-step guidance, and answer product or system questions on demand.

## Hello, I am Lumi, the AI Agent

If you have any questions about our products, please feel free to ask me!

How to deal with abnormal communication of electric meters?

### 1. For first-time installation:

- Verify that the **communication terminal sequence** is correct and connections are secure.

### 2. Check wiring against the official sequence diagram:

### 3. If communication was previously working:

- Inspect for **loose or damaged connectors**. Reconnect firmly and **wait 5 minutes** for the alarm to clear.

### 4. If the communication line exceeds 50 meters:

- Either **shorten the cable** or add a **120  $\Omega$  termination resistor**.

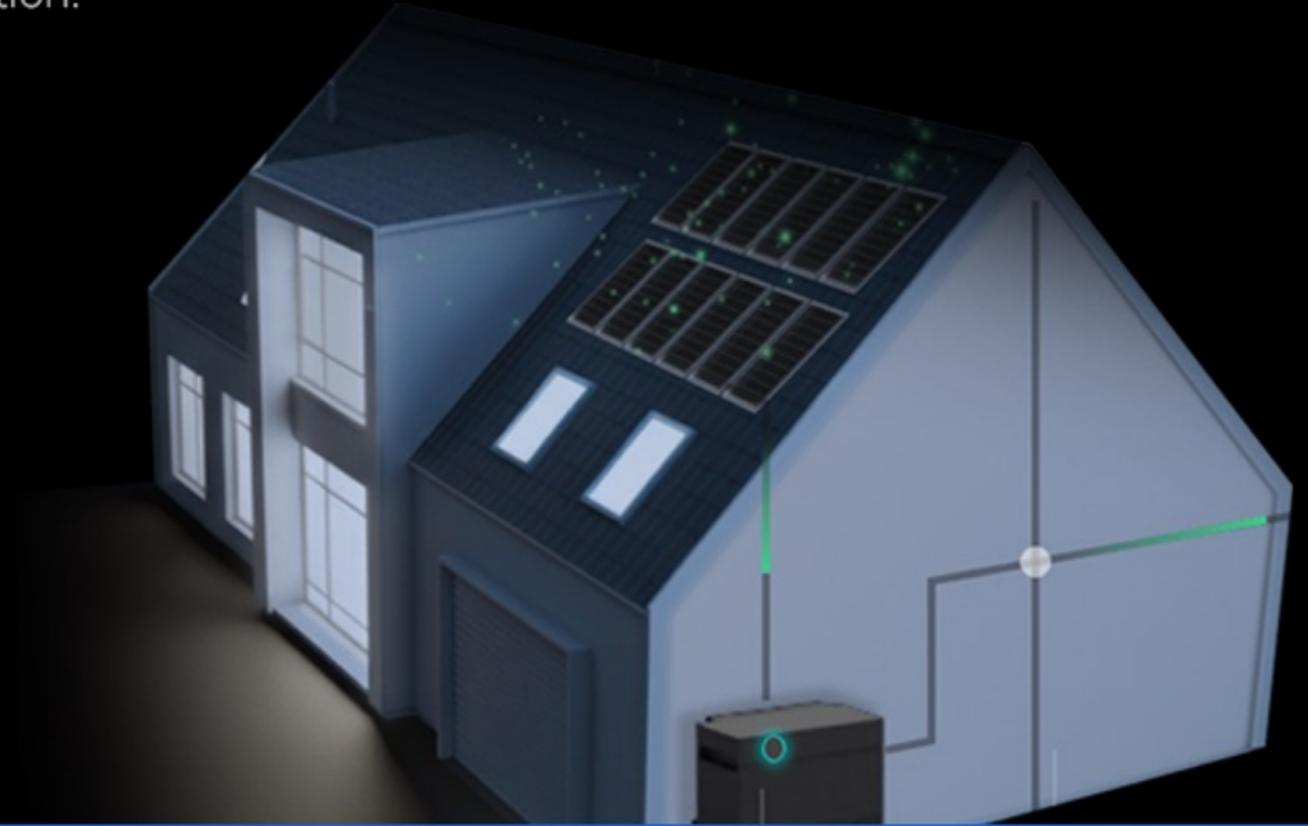

# One-Click Setup, Ready in 1m30s

All-in-One Control | Instant Cloud Connection |  
Auto-Generated Smart Layout

## All-in-One Control

One platform to intelligently manage PV, Battery, generators, and critical loads—from generation to consumption.

## Instant Cloud Connection

Effortless cloud onboarding through QR code or Bluetooth—connect in minutes and start managing instantly.

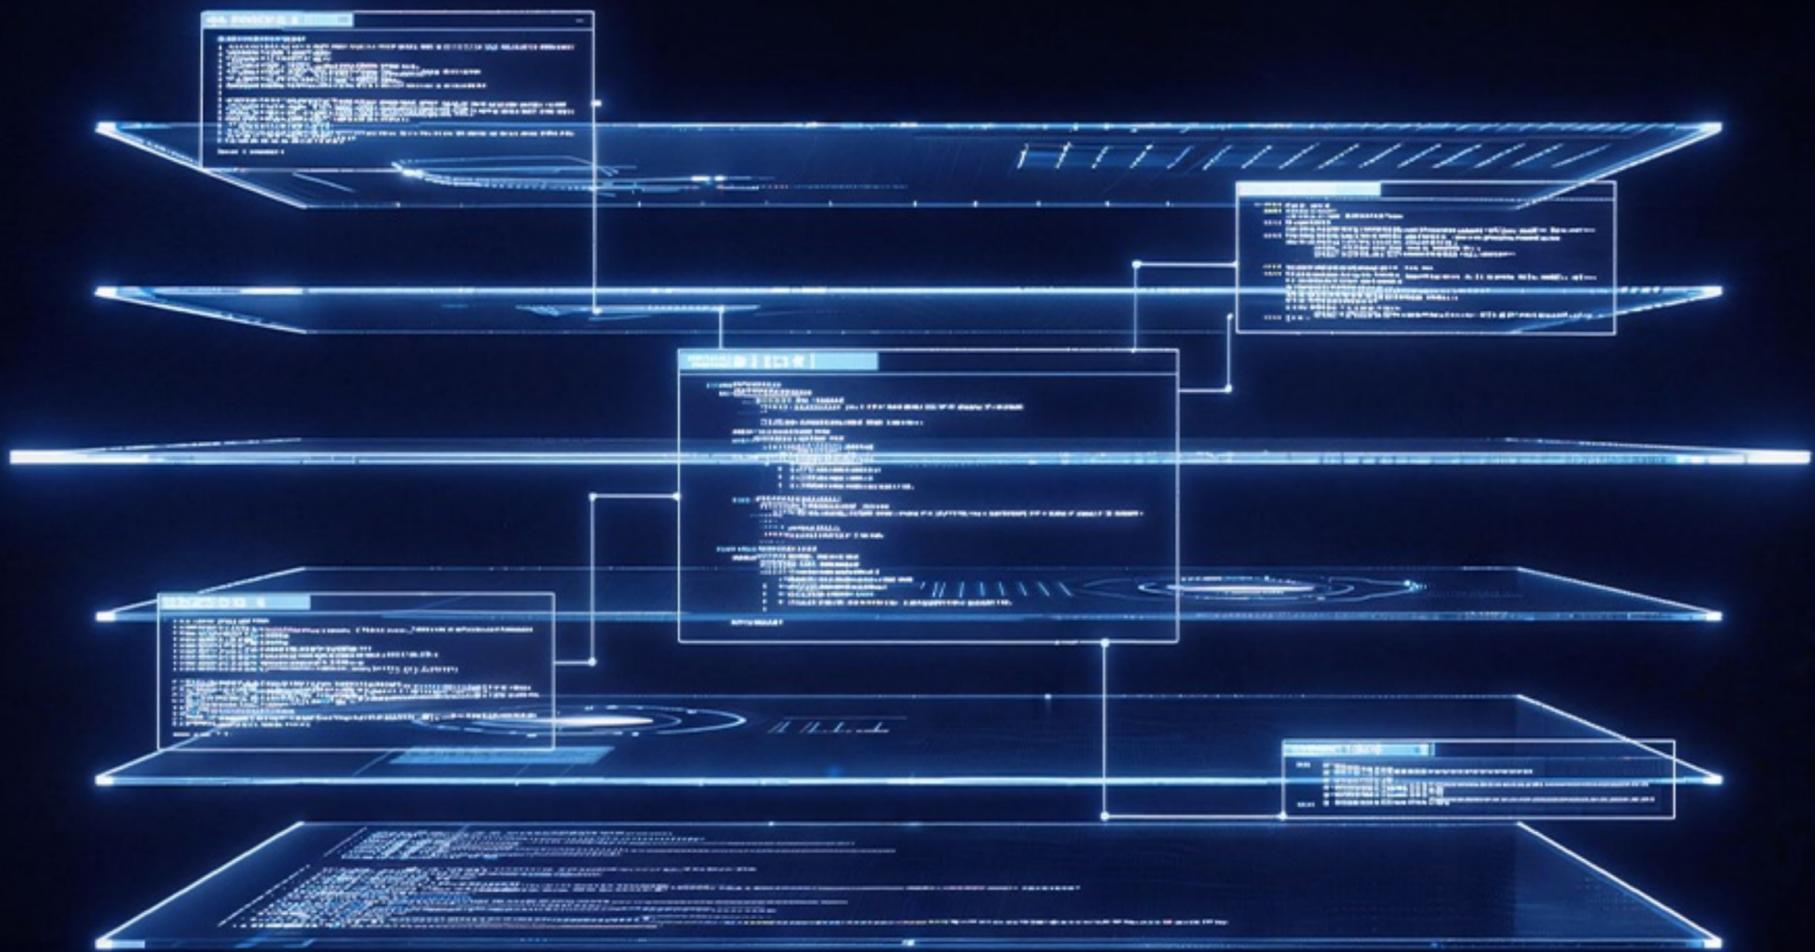

# Auto-Generated Smart Layout

Automatically create intuitive graphical layouts by scanning QR codes—streamlining engineering setup and simplifying daily operations.

# Effortless Management, Total Visibility

Proactive Diagnosis & Reporting | Visual Smart Charts

## Proactive Diagnosis & Reporting

Monitor and diagnose key components with automated fault analysis and maintenance reports, enabling proactive, hassle-free upkeep.

## Visual Smart Charts

From station overviews to device insights, energy flows, performance curves, and revenue analytics—turning data into clear, actionable intelligence.

# Connect Easily, Expand Freely

## Open APIs for Seamless Integration

Open APIs let your storage system fit into how you already work—finance, operations, and future grid participation—without extra manual work.

## VPP-Ready, Ecosystem-Enabled

The platform integrates with grid dispatch centers and third-party aggregators—enabling fast onboarding and turning distributed energy assets into stable grid participation and new revenue streams.
